

# STENHØJ BD REFRIGERATED DRYER

## STENHØJ BD Series Refrigerated Dryer

- Aluminum heat exchanger with three functions: air-to-air exchanger, air-to-refrigerant exchanger, and condensate separator.
- Available in many versions to suit different needs
- User-friendly control system
- Dew point: 5° C

### Description

Model Type BD For post-treatment of compressed air, we recommend STENHØJ's compact refrigerated dryer with a built-in water separator and high performance.

Refrigerated dryers are used to remove condensate, ensuring a low dew point in the compressed air.

Stenhøj's refrigerated dryer features an aluminum heat exchanger with three functions: air-to-air exchanger, air-to-refrigerant exchanger, and condensate separator.
