COMPRESSOR REGULATOR

Regulator with Filter 0-8.5 bar

This regulator allows you to adjust the pressure of the air coming out of the hose. It is particularly popular for use with air tools, as different tools operate best at specific pressures or must not exceed a certain pressure.

Easily adjust the pressure using the rotary knob, setting it to anything between 0-8.5 bar.

Regulators are available in various sizes.

Part No.:

269832: High-pressure regulator 30 bar 1/2" 0.5-16 bar

269835: Regulator with filter, 1/4" 0-8.5 bar
