## The AUTOPSTENHOJ Maestro 2.32 & 2.35 & 2.35 Sport

### What characterizes the Maestro 2.32 & 2.35 & 2.35 Sport?

The AUTOPSTENHOJ Maestro 2.32 & 2.35 are the most reliable 2-post lifts on the market. They impress with their absolutely unique quality with worldwide recognized construction advantages.

The slim, welded column construction provides outstanding stability. In combination with the **carriage on roller bearings** which enables a low friction operation, the Maestros are a guarantee for an extremely long working life. The cold-rolled

spindles and the nut sets made of a special nylon alloy ensure maximum

safety. The **obstruction system** stops the lift automatically when touching down on an obstacle.

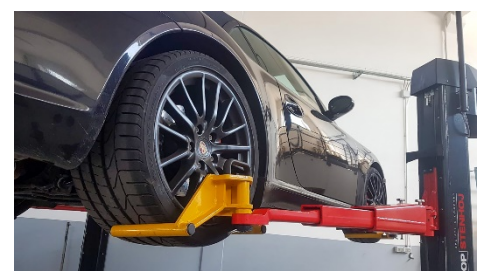

This Maestro series offers a decades of use with minimal maintenance and is appreciated by thousands of customers worldwide.

It almost goes without saying that these lifts have received numerous product recommendations from leading vehicle manufacturers.

## Benefits & features of these Maestros

- Low minimum height
- Very stable welded posts
- Without base frame
- Internal arm locking system
- Available with 2 different portal heights
- Large program of pads
